BOSCH
 Invented for life

Precision with a system – Professional power tools for woodworking.

For 125 years, the name “Bosch” has stood for innovative technology and for masterful tools and accessories. Engineers in four European Bosch woodworking competence centres always consider the needs of professionals in the woodworking trade when developing our professional blue products.

This results in a fully harmonised range comprising tools and accessories that are designed to suit each other and be combined with each other perfectly.

We therefore offer not only leading machines in terms of technical features, we also offer complete solutions for woodworking.

Professional saws from Bosch – the highest standard in power and precision.

Cutting filigree mouldings to size, trimming resilient worktops, cutting boards to length, mounting windproof roof panels, installing load-bearing beams – these are just some of the challenges that you master on a daily basis. And with the help of the precise and reliable professional saws from Bosch, you will achieve unparalleled quality.

Power and precision from the inventor of the jigsaw.

More innovation, more precision, more flexibility, more power, longer lifetime.
You shouldn't expect anything less.

The golden double roller guarantees maximum precision.

The new GST 140 CE and BCE Professional jigsaws offer a new standard for precision work. The patented double roller aligns with the actual position of the saw blade to enable optimum, high-precision guidance of the saw blade. The saw blade is also prevented from bending or wobbling – for perfect work results.

NEW! GST 140 CE and BCE Professional jigsaws

The new standard in precision

- ▶ High-precision saw blade guidance due to patented double roller reduces saw blade bending – for excellent cut precision
- ▶ Tool-free, secure-fitting saw blade changing system (SDS) prevents the saw blade from wobbling to ensure maximum surface quality
- ▶ Compact, lightweight design with small grip circumference enables optimum control when sawing

GST 150 CE and BCE Professional jigsaws

The most powerful tools in their price class

- ▶ High power reserves, even in hard and thick beams, due to powerful and overload-capable 780-watt motor
- ▶ Extremely robust and bend-resistant base plate for the toughest jobs
- ▶ High cutting precision due to new saw blade clamping system

Bend resistance of the base plate in comparison to other jigsaws

Bend-resistant base plate for the toughest jobs.

The base plate of the GST 150 Professional is extremely robust and bend-resistant. It is considerably sturdier than those on comparable tools. The base plate does not bend until the force of over 130 kg is applied to it.

The Bosch system for professional jigsaws.

The optimum solution for woodworking tasks is systematic: cleverly coordinated tools and matching consumable and system accessories. Always one idea ahead and perfectly combinable.

Bosch is the inventor of the jigsaw, and the reinventor, because since building the GEB 1 more than 60 years ago, we have continually enhanced the principle. Today you have the choice between different models that are designed to perfectly suit all application ranges and that have one thing above all in common with the original jigsaw: they truly enrich your everyday work.

For example, the **new GST 140 CE and BCE Professional jigsaws** set an impressive new standard for precise work: the patented double roller reduces saw blade bending and straying to ensure excellent cut precision.

“Extra-Clean for Wood” saw blades – a Bosch innovation – ensure tear-free cut edges and impressive cut quality.

The Bosch circle cutter/guide rail adapter is the perfect addition to all jigsaws. You can use it both to cut circular holes and – in combination with an FSN Professional guide rail – to make clean straight cuts with absolute precision.

A powerful and flexible dust extraction system guarantees clean working. The hose and adapter are rotatable and can be fitted to the tool in a way that does not restrict the work area. The entire device is also very quick and easy to fit.

To also ensure that you always have everything under control when you are on the move, we offer you the **L-BOXX**, which is an intelligent solution for the transport and storage of your tools and accessories. The L-BOXX is available in four sizes, it is made of impact-resistant plastic, has a load-bearing capacity of up to 100 kg, is splash-protected, and it is equipped with Easy Click system and an individually configurable interior.

“We are constantly in contact with various different user groups, in order to meet their requirements. When developing the new ‘Extra-Clean for Wood’ line, we spoke to numerous joiners and incorporated their impressions and their suggestions for improvement. We merged these inputs with our sophisticated manufacturing process to develop a unique saw blade line. In the end, we have launched a product onto the market that sets a new standard with regards to cut quality and tear-free edges.”

Marzell Chanton – plant manager for jigsaw blades, St. Niklaus, Switzerland

Powerful and comfortable even in continuous use – the Bosch hand-held circular saw G-models.

Optimised for guide rails, specially developed for the building trade and tough in use: professional Bosch hand-held circular saws. Their robustness, compact dimensions and low weight with high performance set standards in their segment.

NEW! GKS 55 GCE and 85 G Professional hand-held circular saws

The powerhouses – optimised for guide rails

- ▶ Exact interplay with the new Bosch FSN Professional guide rail system and with rails from other suppliers
- ▶ Mitre cuts with the guide rail are possible without an adapter
- ▶ Fast sawing progress due to powerful motors

The fast way to achieve a straight cut.

A good example of system strength and perfect interaction between tool and accessory: the new Bosch hand-held circular saw G-models have been specially optimised for use with guide rails. The guide rail system enables rapid completion of precise, straight cuts. The FSN VEL Professional connecting piece can be used to connect rails of different lengths precisely, sturdily and quickly. The FSN WAN Professional angle guide helps to align the guide rails precisely and at accurate angles on the workpiece.

NEW! FSN 800, FSN 1100, FSN 1600, FSN 2100 and FSN 3100 Professional guide rails

Rail technology for exact guidance

- ▶ The rails remain exactly straight, even when using an extended rail, due to the self-aligning connecting piece
- ▶ VEL connecting piece for quick and sturdy connection of guide rails
- ▶ Anti-splinter guard for clean cut edges and non-slip strips for secure handling

Precision and power – the new plunge circular saw for a clean cut.

The Bosch plunge circular saw – the expert for cutting panel materials and wooden materials. The high-quality components of this saw and the optimum coordination with the new Bosch guide rail system ensure excellent cut quality.

NEW! GKT 55 GCE Professional plunge circular saw

Delivers power and precision to give you a clean cut

- ▶ Clean, precise cuts due to high-quality machine components, precision saw blade and matching guide rail system
- ▶ Comfortable working, especially indoors, due to highly efficient dust extraction and noise-reducing saw blade
- ▶ Adjustable speed, powerful 1400-watt motor and Constant Electronic for cutting different materials such as wood, panel materials, aluminium and acrylic glass

The Bosch system for the professional plunge circular saw.

Precise work results with the new Bosch plunge circular saw and the matching system accessories.

The **Top Precision Best for Wood saw blades** are optimised for the highest demands. They are laser-cut from premium steel (up to HRC 46) – so they stand for high precision and no blade warping.

Special carbide teeth made of MicroteQ, a carbide powder with microfine grains, minimise wear on the cutting edges – for the best cut quality and extremely long lifetime. **CleanteQ** is a special chrome coating that reduces the adhesion of residues. It therefore protects the blade against corrosion and also keeps it cool.

StabilteQ is a technology that uses polyurethane-filled damping slots to reduce vibration. For you this means increased precision and more comfort. Noise development is also reduced. Laser-cut expansion slots additionally ensure high blade stability and accuracy.

The **FSN guide rail system** is the perfect addition for maximum precision, enabling you to make exact cuts of any length. When your work is done, you can store and transport your saw quickly and safely in the matching **L-BOXX**.

The Bosch system for the professional plunge circular saw.

Powerful, ergonomic and robust – the new Bosch sabre saws.

Bosch sabre saws impress with their powerful motors and ergonomic design. This enables them to master every task quickly and reliably.

Bosch sabre saw blades for every material.

Brick, metal, iron, aluminium, wood and plastic – Bosch's sabre saw blades make better cuts in every material. The SDS system on Bosch sabre saws makes it possible to change the saw blade in seconds.

NEW! GSA 1100 E Professional sabre saw

Optimum visibility in any work situation

- ▶ Integrated LEDs for a better view of the workpiece
- ▶ Powerful 1100-watt motor for fast sawing progress
- ▶ Metal hook for hanging up the tool during a work break

High performance with anti-vibration system.

The new GSA 1300 PCE Professional offers a powerful 1300 watts – and the lowest vibration in its class. This is made possible by the anti-vibration system, which consists of an anti-vibration handle and mass balance in the tool. For you this means low-fatigue working, even in continuous use.

NEW! GSA 1300 PCE Professional sabre saw

Lowest vibration in its class – and a powerful 1300 watts

- ▶ For low-fatigue working: anti-vibration handle and mass balance
- ▶ 1300-watt high-performance motor with Constant Electronic for the toughest applications
- ▶ Pendulum stroke for fast sawing progress

Unlimited applications – Bosch multicutters. The blue problem solvers.

The name says it all: Bosch multicutters stand for perfect trimming, adjusting and repairing. Comprehensive accessories enable countless possible applications and are fitted in just a few moves.

“Developing new accessories for our oscillating multitools (OMT) is as versatile as the applications themselves. I’m constantly in contact with our product marketing, multicutter engineering, quality control and production, in order to develop a perfectly coordinated system for our professional customers. There’s no better feeling than hearing the customer say that the tool and accessory worked together impeccably.”

Daniel Grolimund, head of OMT accessories development, Solothurn, Switzerland

GOP 10,8 V-LI Professional cordless multicutter

Perfect trimming, adjusting, repairing

- ▶ Wide range of applications such as plunge cuts, flush sawing and sanding due to comprehensive range of accessories
- ▶ Excellent handling due to compact design and weight of only 1.0 kg
- ▶ Up to 20,000 oscillations per minute for the same professional performance as comparable mains-powered tools

NEW! GOP 300 SCE Professional multicutter

Accessory changes in no time

- ▶ SDS system for fast, tool-free changing of accessories with maximum convenience
- ▶ Powerful 300-watt motor with Constant Electronic for constant work progress in every application
- ▶ Slim grip circumference for more comfortable working in precision applications and in continuous use

Bosch benchtop saws – master every requirement.

Bosch benchtop saws combine high power with exceptional precision. With their high-torque motors and high-quality features – e.g. integrated laser – they enable fast, precise work in every type of wood. This is why they are used wherever powerful, accurate and high-quality work is required.

-
- ▶ Gliding mitre saw P. 22
 - ▶ Mitre saw P. 23
 - ▶ Combination saw P. 23
 - ▶ Table saws P. 26

Maximum efficiency in every job – powerful professional benchtop saws.

Sawing panels, planks and boards, and cutting bevels and angles is no problem for the Bosch benchtop saw range. They work quickly and extremely precisely thanks to their powerful motors and integrated laser guide (on the GCM 12 GDL Professional and GTM 12 Professional).

A WORLD FIRST! GCM 12 GDL Professional double bevel gliding mitre saw

Sawing like never before: extremely smooth with lasting precision

- ▶ Lasting precision due to innovative, maintenance-free and extremely robust guide arm
- ▶ Frictionless slide mechanism ensures very easy sawing without loss of power
- ▶ Accurate cuts and maximum cut quality due to integrated double line laser and “Top Precision Best for Wood” saw blade

	A WORLD FIRST! GCM 12 GDL Professional
Rated power input (W)	2000

NEW! GCM 10 J Professional mitre saw

Powerful and compact

- ▶ Powerful 2000-watt motor – for precise work in a wide variety of materials
- ▶ Very compact design, low weight (14.5 kg) and integrated handle for easy transport
- ▶ Extremely long lifetime due to robust construction and dust-resistant motor technology

GTM 12 Professional combination saw

Multi-talented tool with 100% precision

- ▶ Table saw and mitre saw in one tool
- ▶ Precise work with integrated laser
- ▶ Powerful 1800-watt motor for fast work progress up to 95 mm cutting depth in hardwood*

*in the mitre saw function

GCM 12 GDL Professional: extremely smooth due to innovative guide arm.

The innovative slide mechanism, which is operated by a robust die-cast aluminium glide arm, ensures extremely smooth movement and lasting precision. The glide arm is ball bearing mounted, absolutely maintenance-free and ensures smooth sawing comfort from the first to the last minute the tool is used.

The Bosch system for professional blue benchtop saws.

You can complete any task with the right blade. Optimum dust removal perfects the professional workplace.

Excellent cut quality and a clean workplace: it especially depends on the saw blades. And on reliable dust extraction.

Top Precision saw blades – Top results in every cut and blade longevity are a must for every saw blade. The quality of the carbide used to produce the teeth of a saw blade is an essential success factor for a very high-quality product. Bosch is the only manufacturer to produce its own carbide powder. Using precise mixture of cobalt (for its extreme robustness), titanium (for its anticorrosive properties) and tungsten (for its hardness), we create different blends specifically optimised for the applications. This enables maximum lifetime and optimum cut quality to be achieved.

Top Precision Best for Wood: Perfect, clean cuts in all wooden materials. Ideal for table saws, mitre saws and sliding mitre saws. Particularly smooth running, considerably less noise, noticeably reduced vibration – and extremely long life.

Best for Laminate: For the perfect cut in all laminate floorings, with or without sound-dampening layer.

Best for Multi Material: A most versatile blade thanks to a particularly thin kerf for easier sawing and less wastage. A special tooth geometry with negative hook angle ensures perfect cuts.

The GAS 50 M Professional wood extractor ensures ideal dust removal at the workplace around your benchtop saw. The Plus-Clean electromagnetic filter cleaning system guarantees permanent suction power. Its remote automatic switching also provides you with additional convenience.

GTA 3800 Professional, the flexible saw stand for long workpieces, enables precise work with long workpieces and fits all Bosch mitre saws and combination saws.

Sawing large work materials isn't even a small problem.

The table widener and extension (on the right and on the back) enable stable sawing of even large workpieces with the GTS 10 XC Professional. Large support surfaces ensure safe and comfortable sawing. The 2100-watt powerful motor is additionally protected by an electronics package and has the required power reserves to also saw boards up to 79 mm thick.

NEW! GTS 10 XC Professional table saw

The versatile tool with a powerful 2100 watts

- ▶ Powerful 2100-watt motor with motor brake, starting current limitation, overload protection and Constant Electronic for the toughest applications
- ▶ Versatile due to integrated slide carriage as well as table widener and table extension
- ▶ Tool-free lowering of the riving knife

The Bosch system for professional routers.

Our tools have an exceptionally precise system. So whether you are doing constructive trimming work, working with templates, routing grooves or working on edges – Bosch always has precisely the right solution for you.

The **SDS template guides** are designed to suit the Bosch routers perfectly, and they enable exact template routing and tool-free mounting – for efficient working.

The **FSN Professional guide rails and the matching FSN OFA Professional guide rail adapter** form a system for enabling easy alignment and precise routing with fine adjustment. The **parallel guide with fine adjustment** does a perfect job of parallel-guiding all Bosch routers. It is also available with extra-long bars.

The **GAS 50 M Professional** is the ideal special extractor for dust-free working with Bosch hand-held circular saws, jigsaws, routers and sanders. As a dust category M certified wood extractor, it is also suitable for extracting liquids. The Plus-Clean electromagnetic filter cleaning system guarantees permanent suction power.

The **intelligent L-BOXX transport and storage system** ensures safe transport and optimum storage of your router and its accessories. The L-BOXX is fully compatible with the German TÜV-tested in-vehicle equipment system from Sortimo.

Noticeably the best results – professional planers and sanders.

Working on and finishing surfaces – quickly, comfortably and effectively. To enable you to do this, Bosch planers not only have a powerful drive, they also have the unique Woodrazor system. The Bosch orbital sander impresses with the finest surface finish and its excellent handling.

The 1-blade Woodrazor system for perfect surfaces.

The patented Bosch Woodrazor system has only one planer blade, so you no longer have to go to the trouble of aligning a second blade, and optimum results are guaranteed. The Bosch Woodrazor reversible blades are hard-wearing, ultra-sharp and durable for perfect surfaces without the need for subsequent finishing work.

GHO 26-82 Professional planer

The handy planer with lots of power

- ▶ Small, handy machine with powerful 710-watt motor, ideal for all on-site fitting work
- ▶ The fastest and least expensive blade changes on the market due to durable Woodrazor reversible blades and the easiest possible adjustment
- ▶ Comfortable working because chip clearance can be set to either the right or left

GHO 40-82 C Professional planer

The planer for the highest surface quality

- ▶ The highest surface quality due to ultra-sharp blades and constant speed, even when working in hardwood
- ▶ The fastest and least expensive blade changes on the market due to durable Woodrazor reversible blades and the easiest possible adjustment
- ▶ The longest lifetime due to precise aluminium bearing seat and thermodynamic motor protection

Putting an end to fine dust.

Bosch is the only manufacturer with a certification for air purity. The Bosch micro-filters collect 90% of dusts, even particles 100 times finer than a human hair. Another advantage is the collection box, which removes the need for expensive filter bags.

GSS 140 A Professional orbital sander

Every type of sanding sheet sits perfectly with Easy-Fit

- ▶ A perfect hold of the paper without creasing and tearing due to Bosch Easy-Fit System – for Velcro-type paper and rolls of paper
- ▶ Bosch micro-filter system: perfect, efficient dust extraction
- ▶ Ergonomic design with two softgrip surfaces for two grip positions

GSS 280 AE Professional orbital sander

The sander for the highest surface quality

- ▶ High-quality sanding plates for the best surface quality and five times longer lifetime than rubber sanding plates
- ▶ Quiet and low-vibration for more comfortable working
- ▶ Best bearing seal and high-quality aluminium bearing flange for smooth running and long lifetime of the motor

The freehand experts – professional blue random orbit sanders.

Bosch random orbit sanders ensure perfect surface results – even on curved and shaped workpieces. Smooth running and freewheel brakes guarantee a surface finish free of scores and an optimum material removal rate.

GEX 125-1 AE Professional random orbit sander

Comfortable sanding in any work position

- ▶ Compact, ergonomic design with large softgrip surfaces for variable grip positions and outstanding comfort
- ▶ Bosch micro-filter system: perfect, efficient dust extraction
- ▶ Speed preselection for material-specific working

GEX 150 Turbo Professional random orbit sander

Three tools in one

- ▶ Just one click: switch from fine sanding to coarse sanding or polishing
- ▶ Five times more material removal in turbo operation (coarse sanding); the time-saving means that the tool pays for itself after a few working hours
- ▶ Longest lifetime thanks to perfect bearing seal, overload protection and a robust turbo switch

NEW! GEX 125-150 AVE Professional random orbit sander

Minimal vibration: no more tingling in your hands

- ▶ Unique vibration damping: the lowest vibration even in continuous use
- ▶ The highest surface quality: sanding unit is decoupled from housing to ensure consistent contact pressure
- ▶ Flexibility for every application range due to the choice of using 150 mm or 125 mm sanding pad diameter

Faster results – less strain.

Extended periods of sanding work usually used to lead to numbness in your hands that could last for days. This is now a thing of the past. The new GEX 125-150 AVE Professional random orbit sander offers the lowest vibration on the market. Its vibration level is less than the critical limit of 2.5 m/s^2 . This is achieved by completely decoupling the grip surfaces from the motor housing using polymer elements. It also has the best material removal rate in its class. The sanding pad rests perfectly flat, so it delivers the best surface results even when the contact pressure is unevenly distributed.

The Bosch system for professional sanders.

Matching abrasives and reliable dust extraction expand the application range of sanders. We pursue a strategy of innovation for this, especially when it comes to abrasives.

The **new abrasives range** offers **the right abrasive for virtually every requirement and application**. For outstanding results on the most common materials from belt sanding through to hand sanding. Different paper colours help you to choose the right sanding paper/material combination. Red is our Best for Wood, whilst white is Best for Paint.

When making abrasives, Bosch uses the many years of experience of sia Abrasives, a company which recently became part of Bosch. sia Abrasives is known as one of the world's leading manufacturers of innovative abrasives. The flexible abrasives are all produced at top quality in Switzerland. This ensures that, even when working on demanding surfaces and valuable materials, the desired sanding results can be achieved and additional costs incurred by damaging workpieces are eliminated. From abrasives for hand sanding through to the appropriate abrasive for all conventional hand-held power tools: Bosch offers the professional and complete range of abrasives that professional trades people demand.

Sanding pads from Bosch are available in extra-soft, soft and hard foams for every application.

Sanding plates from Bosch increase the functionality of orbital sanders. There are sanding plates with a delta tip, extended sanding plates, sanding plates with and without Velcro-type fastening – and guaranteed the right plate for every application.

Dust-free working with the GAS 50 M Professional: this special extractor for wood is the ideal addition for clean, dust-free working. It reliably collects even the finest particles, and it is even suitable for extracting liquids.

The L-BOXX is the convenient, stackable transport system for Bosch sanders. Thanks to a wide range of accessories, it is individually configurable for power tools, accessories and consumables.

“When manufacturing rotor blades for wind turbines, the interaction between sander and abrasive is a significant efficiency multiplier. Dialogue with professional tradespeople resulted in the combination of the GEX 125-150 AVE Professional with the Bosch ‘Best for Paint’ abrasive. Thanks to our many years of expertise, we have succeeded in offering a convincing solution where the crucial factors are material removal rate, surface quality and efficiency.”

Jürg Schnyder, sia applications specialist, abrasives competence centre, Frauenfeld

Sanding performance*

*Sanding performance = material removal rate and lifetime

A direct hit every time – Bosch nailers and staplers.

Power, precision and robustness – From framing nailer for frame construction to a finishing nailer for interior fitting work or brad nailer and stapler for furniture construction: these tools guarantee you a fast work progress and neat and efficient working thanks to the innovative Bosch Full Force Technology or the Wood Protection System.

-
- ▶ Framing nailers P.44
 - ▶ Finishing nailers P.45
 - ▶ Brad nailer P.46
 - ▶ Stapler P.46
 - ▶ Coil nailer P.47

Hard on the nail, soft on the wood – innovative Bosch pneumatic nailers.

Bosch pneumatic nailers feature powerful drives for optimum work progress and compactness for working in any position. Thanks to the unique Wood Protection System, they are also gentle on the workpiece.

GSN 90-21 RK Professional, GSN 90-34 DK Professional and **NEW!** GSN 100-34 DK Professional framing nailers

The powerful tools for optimum work progress

- ▶ Full power, even at high firing frequency, due to innovative Full Force Technology
- ▶ Fast work progress due to tool-free release of the magazine when nails are jammed in the firing channel
- ▶ Compact design for more comfortable working, even in continuous use

GSK 64 Professional and **NEW!** GSK 64-34 Professional finishing nailers

The compact tools for every work position

- ▶ Very compact tool design also enables work in hard-to-reach areas
- ▶ Quick and easy drive-depth adjustment by means of tool-free setting on the tool
- ▶ Wood Protection System means no blank firing, thus preventing damage to the workpiece

Optimum workpiece protection: Wood Protection System.

The Wood Protection System from Bosch protects the wood by disabling the triggering mechanism when the magazine is empty (on GSK 64 Professional, GSK 50 Professional and GTK 40 Professional). Your advantage: the workpiece cannot be damaged by the striking pin and the tool components are not strained by blank firing. In addition to this, all muzzles on these Bosch pneumatic nailers are equipped with a detachable rubber tip – for optimum workpiece protection.

**Every second counts, every nail is driven perfectly:
Bosch Full Force Technology.**

The Full Force Technology (standard on all Bosch pneumatic nailers) has been developed and patented by Bosch. It has a new type of valve system that reduces the size of the pressure chamber without sacrificing impact energy. This makes the tool more compact and accelerates the build-up of pressure in the tool. It therefore enables you to drive nails in flush even at high firing frequency – for less reworking and higher productivity.

NEW! GCN 45-15 Professional coil nailer

The robust tool for exact positioning

- ▶ Robust construction with additional protectors for high reliability and perfect protection of the tool
- ▶ Carbide-reinforced muzzle for a long lifetime
- ▶ Tool-free adjustable stop for perfect positioning on roof shingles of different sizes

Bosch cordless screwdrivers and drywall screwdrivers – the right tool for every job.

Bosch lithium-ion cordless tools for professionals from 3.6 to 36 volts impress with their extremely long battery runtime, optimum weight and extreme durability. With more than 50 lithium-ion products, Bosch has a comprehensive range of cordless tools – also especially for woodworking, such as cordless jigsaws, circular saws and sabre saws.

Bosch drywall screwdrivers are ideal for driving rows of screws and for comfortable continuous use. Due to their versatility and comprehensive accessories, Bosch cordless and drywall screwdrivers ensure that you have the right tool for every job.

-
- ▶ Cordless screwdrivers P. 50
 - ▶ Cordless drill/drivers P. 51
 - ▶ Drywall screwdrivers P. 52

Compact. Powerful. Cordless.

A selection of our cordless screwdrivers.

Cordless screwdrivers with Bosch lithium-ion technology set new standards in compact size, capability and reliability. These tools impress with their extremely long battery runtime, optimum weight and durability.

Bosch cordless tools – the right tool for every job.

With more than 50 lithium-ion products, Bosch has a comprehensive range of cordless tools – also especially for woodworking, such as cordless jigsaws, circular saws and sabre saws.

More information can be found in the current cordless catalogue or at www.bosch-professional.com/gb/en

**GSR 14,4-2-LI and GSR 18-2-LI Professional cordless drill/drivers**

The lightest tools in their class

- ▶ Lowest weight at only 1.3 kg (14.4 Volt)
- ▶ Perfect handling due to very short design (head length of only 196 mm) and slim, ergonomic grip circumference
- ▶ Newly developed 2-speed planetary gearbox for a powerful and versatile range of applications when screwdriving and drilling

GSR 14,4 V-LI and 18 V-LI Professional cordless drill/drivers

The shortest endurance runners

- ▶ Extremely compact due to shortest design (only 185 mm) in their class and low weight (only 1.7 kg, 14.4 Volt/3.0 Ah) for perfect handling
- ▶ Up to 500 screws (6 x 60 mm in softwood) with only one battery charge (18 Volt/3.0 Ah)
- ▶ Powerful 67 Nm (18 Volt) due to newly developed gearbox design and new 4-pole Bosch high-performance motor

From powerful to fast – the new drywall screwdrivers.

The drywall screwdrivers are designed for quick and efficient screwdriving, driving rows of screws, and for comfortable continuous use. All of the tools have an ergonomic design, a lock-on button for continuous operation, and they can be comfortably operated with only one hand.

NEW! GSR 6-25 TE Professional drywall screwdriver

The powerful drywall screwdriver

- ▶ High torque enables powerful screwdriving
- ▶ Comfortable working due to ergonomic design and depth stop that can be operated with one hand
- ▶ Precise screwdriving to a constant depth due to exact shut-off clutch

NEW! GSR 6-45 TE Professional drywall screwdriver

The universal drywall screwdriver

- ▶ Optimum coordination of torque and speed enables a wide range of applications
- ▶ Comfortable working due to ergonomic design and depth stop that can be operated with one hand
- ▶ Precise screwdriving to a constant depth due to exact shut-off clutch

Efficiency added on: the collated screwgun attachment for Bosch drywall screwdrivers.

The MA 55 Professional collated screwgun attachment is available as a system accessory (Part no.: 1 600 Z00 00Y) that can be added on to the GSR 6-25 TE and GSR 6-45 TE Professional. It can be mounted, dismantled and adjusted without the need for additional tools. Designed for high RPMs, it enables you to precisely drive rows of screws at top speed.

NEW! GSR 6-45 TE drywall screwdriver + MA 55 Professional

The efficient drywall solution

- ▶ Enables precise driving of rows of screws at top speed
- ▶ Tool-free adjustment and mounting/dismantling of the collated screwgun attachment
- ▶ Comfortable working due to ergonomic design and low weight

NEW! GSR 6-60 TE Professional drywall screwdriver

The extremely fast drywall screwdriver

- ▶ High speed enables very fast fixing of plasterboards
- ▶ Comfortable working due to ergonomic design and depth stop that can be operated with one hand
- ▶ Precise screwdriving to a constant depth due to exact shut-off clutch

Mobile working – clever solutions for safe tool storage and easy transport.

The Bosch L-BOXX is the intelligent, modular transport and storage system for power tools, accessories and consumables.

The L-BOXX – space for tools and more.

Anybody who has to transport multiple tools and accessories is almost certainly going to need the L-BOXX. The blue boxes are available in 4 sizes, they are easily clicked together, and they can carry up to 40 kg in total when stacked together. Each L-BOXX can hold up to 25 kg and can be individually configured as required.

L-BOXX

The intelligent transport and storage system

- ▶ Unbeatably easy system of clicking together and separating the different L-BOXXes for transporting multiple power tools and accessories
- ▶ Exclusive compatibility with the German TÜV-tested in-vehicle equipment system from Sortimo
- ▶ Flexible options for storing power tools, accessories and consumables due to Sortimo's wide range of accessories
- ▶ Very robust lid: fully splash-protected and a load bearing capacity of up to 100 kg

Bosch saw stands for benchtop tools are assembled in seconds and are also convenient to transport on uneven construction site terrain.

**Unlimited flexibility –
the mobility concept for benchtop saws.**

The GTA 2500 W Professional and GTA 60 W Professional saw stands are a means of transport and a work bench in one. They fit all Bosch mitre saws, sliding mitre saws, gliding mitre saws and tables saws. They are assembled and dismantled with only one lever movement, without having to remove the benchtop saw.

GTA 60 W Professional and GTA 2500 W Professional saw stands

For table saws or for mitre saws and sliding mitre saws

- ▶ Double the benefit: a means of transport and a work bench in one
- ▶ Easy to assemble and dismantle with only one lever movement, without having to remove the benchtop saw
