Fast and
powerful
cuts
through brick.

BOSCH
Invented for life

NEW! The innovative "special
for Brick" sabre saw blades.
For all conventional sabre saws.

BOSCH
Invented for life

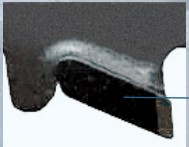

Fast cuts through brick.

For sawing rip cuts
and cross cuts.

The "special for Brick" sabre saw blades from Bosch set new standards for cutting brick.

Durable, individually soldered-on tungsten carbide teeth quickly and powerfully cut through conventional types of brick.

Solid tungsten
carbide teeth

special for Brick

Less fatigue, even when performing lengthy applications.
Low vibration thanks to optimised weight of the saw blade.

Safe working: cutting depth
limitation prevents uncontrolled
tooth engagement.

The 1/2" universal shank fits
all conventional sabre saws.

- Easy, clean and fast cutting of building materials such as brick, aerated concrete, limestone, cement composite boards, and similar materials.
- Considerably less dust formation when cutting in comparison to conventional cutting methods, e.g. using diamond cutting discs.
- Fits all conventional brands of sabre saw. Recommended power: 1000 watts or more.

For sawing in
mortar joints.

Or for sawing
cut-outs.
